aSuggestion. Life Improved.

FOR AGENCY LEADERS IN AUTISM AND I/DD SERVICES

The Digital Health Overlay for Autism and I/DD services

Engage the people you support between visits. Equip your care team with a treasure chest of digital tools. Turn everyday engagement into billable events.

Works alongside your EHR | **Pay only for engaged users** | **Private and moderated**

www.aSuggestion.com

aSuggestion for Wellness & Care

THE CHALLENGE

Your mission runs on people. Your people are stretched thin.

Every agency feels it. Fewer hands, more documentation, and the people you support spending long stretches between visits with little structure or connection.

37.1%

Annual turnover among Direct Support Professionals

40.7%

Of DSPs who leave do so within their first six months

Source: National Core Indicators (NCI-IDD), State of the Workforce Survey, 2024

Gaps between visits

Engagement, routine and connection drop off when staff are not in the room.

Operational distractions

Notes, goal evidence and visit verification take time away from direct support.

Disconnected tools

Your EHR holds the record, but not the day-to-day engagement that proves progress.

Audit exposure

Billable events that are not captured cleanly are revenue at risk.

THE ASUGGESTION VIEW

Most agencies don't need another system to replace. They need a layer that makes the systems and operations they already have more effective.

HOW IT WORKS

One overlay. Three layers of value.

aSuggestion sits on top of your existing operations. Nothing to rip out, nothing to migrate. Each layer feeds the one below it.

ENGAGE

Participant layer

Moderated community, activities and live check-ins that give people a reason to log in every day.

- Social Rooms
- Games and Activities
- Check-In Chats

EQUIP

Care team layer

A treasure chest of tools to plan, run and track programs, all tied to Person Centered Goals.

- Person Centered Goals
- Notes
- Wellbeing Dashboard
- Community Instruction

DOCUMENT

Compliance layer

Every session, outing and interaction becomes timestamped, exportable evidence linked to billable events.

- Visit Trac
- Billable time logs
- Data Export

Your EHR and existing systems

Exports drop into your EHR, and assistive technology integration keeps aSuggestion working with the tools you already use. We complement your systems; we don't replace them.

WHAT FLOWS THROUGH IT

Engagement → Goal evidence → Billable events

FOR THE PEOPLE YOU SUPPORT

A place people actually want to be.

Engagement is the engine. If people don't come back, nothing else works. aSuggestion is built to be genuinely enjoyable, with growth built in.

70% Fun and engaging | **30%** Instructional

The content rule behind every room and feed: mostly fun, always building skills.

Creative tools

AI cooking, interactive stories, Arts and Crafts, Hand/Eye coordination activities, Stimulating and skill building tasks, plus a curated video library.

Games and Activities

Memory Match, Breathing Buddy, Money Management, Routine Sequencing, Weather Wardrobe and more, each building a real-life skill.

Social Rooms

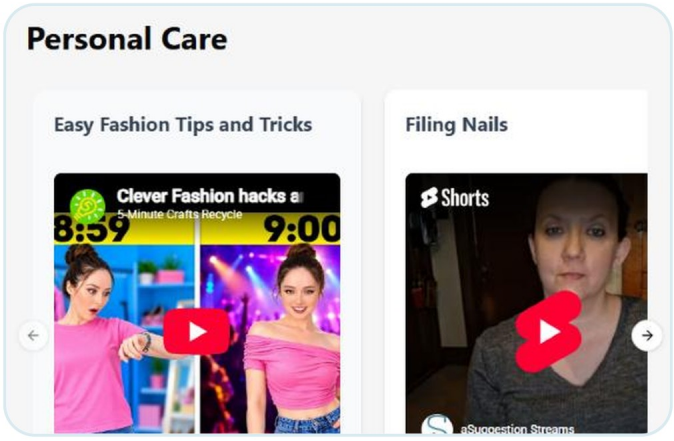

Topic-based community spaces, from arts and hobbies to career coaching and healthy living.

Check-In Chats

Scheduled one-on-one video sessions with trained facilitators that reduce isolation and build trust.

AI Cooking. Safe recipes, a picture for every step.

Video library. Curated videos, by topic.

Accessible by design. Plain language, clear layouts, and compatibility with the assistive technology your participants already use.

FOR CARE TEAMS

A treasure chest for day-to-day program operations.

Ready-to-use digital tools and resources that help your staff facilitate and track programs. Every one of them connects back to the two things that matter most.

Every tool ties to Person Centered Goals + Agency Billable Events

Person Centered Goals

Choose goals by domain and let evidence surface automatically from real activity.

Notes

Structured notes that capture what happened and why it matters to the plan.

Engagement Levels

See who is participating, who is drifting and where to follow up.

Wellbeing Dashboard

Trends in mood, participation and activity, at a glance.

Community Instruction

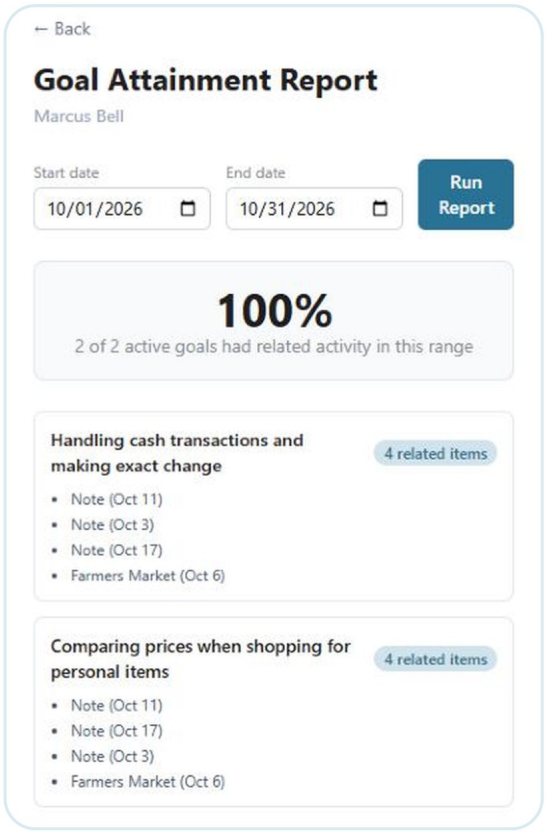

Plan and document community outings, from grocery runs to library visits.

Program Activities

Ready-made activities and content to run in day programs and residential settings.

Data Export

Pull complete activity histories into Excel or Google Sheets in a few clicks.

Goal evidence surfaces automatically from notes and outings.

Engagement Levels roll every outing, session and task into one view.

FOR COMPLIANCE AND BILLING

Every interaction documented. Every billable event captured.

The work your team already does becomes the record you need, without a second round of paperwork.

FROM TOUCHPOINT TO RECORD

1

It happens

Any touchpoint across the system in any setting.

2

It's verified

Visit Trac confirms arrival and departure with the time and a location type.

3

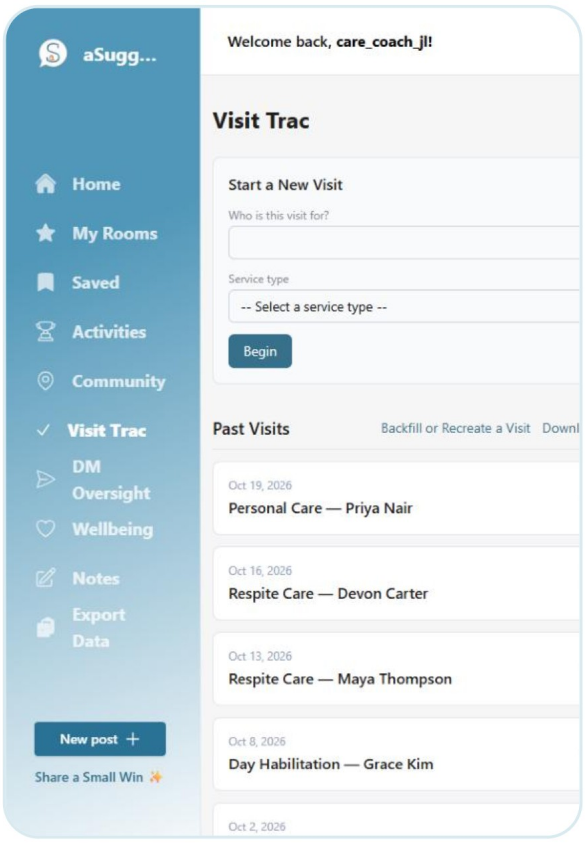

It's documented

Notes, summaries and goal evidence attach to the person.

4

It's ready

Export to Excel, Google Sheets or PDF, ready for your EHR.

- **Visit Trac.** Confirms arrival and departure with the time and a location type, never an address. Community outings estimate mileage.
- **Billable time logs.** Session time captured as it happens, ready for review.
- **Check-In Chat transcripts.** Sessions are recorded and transcribed for your care team.
- **Audit-ready records.** Every interaction is timestamped and attributable.
- **EHR-ready exports.** Spreadsheets and a printable Notes PDF that staff can bring into your EHR.
- **Organization-wide export.** Users, rooms, posts, sessions and time logs in one export.

WORKFORCE · THE DSP PIPELINE

Interns today. Direct Support Professionals tomorrow.

Our student interns spend their placements creating meaningful and engaging content across the platform supporting our community. By the time they finish, they already know your population, your values and our tools. The DSP Pipeline connects those alumni directly with partner agencies that are hiring.

Pre-trained in person-centered support

Fluent in our platform and community

A hiring channel built into your partnership

SAFETY BY DESIGN

Built to keep people safe.

- Every post, comment and message is reviewed by AI moderation to ensure safety for both user and community.
- Trusted human moderators, often the participant's own care providers.
- Invitation only. We send and manage every invitation at your agency's direction, built to keep predators out.
- Real-time alerts for safety-critical content, with clear escalation to care teams.
- **Human Authenticity Mandate.** People talk to people here. Member posts and comments are never AI-generated.

Private. Moderated. Human.

PARTNER WITH US

Simple to start. Fair to scale.

1
Introduce

Tell us who you'd like to invite. We send and manage every invitation for you.

2
Enroll

Participants accept their invitation and join your organization's private space in addition to our broader community of users.

3
Equip

Your team gets the full treasure chest, with reporting from day one.

Pay only for engaged users.

You are billed monthly for the people who actively use the platform, not for seats that sit idle. When engagement grows, so does the value you get from it.

Supported by a growing network of technology, self-advocates, and thought leadership partners.

aSuggestion. Life Improved.

See it in action.

Tailored to your programs, your people and your billing.
